

VALTRA SmartTouch

**YOUR
WORKING
MACHINE**

COMMAND YOUR N, T AND S SERIES.

Valtra SmartTouch has raised usability to the new level. It's more intuitive than your SmartPhone and it's available to N, T, and S Series tractors (135 - 405 HP). Settings are easily accessible within only two taps or swipes.

Easy to navigate menu structure.

Logical to set up settings with swipe gestures. All settings are automatically stored in memory.

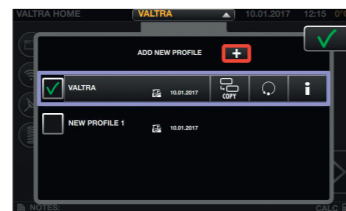

Intuitive way to set up settings with large controls and easy to understand functions.

From any control you can control any hydraulic service including hydraulic valves (front and rear), linkages (front and rear) or front loader.

Easy configuration of worklights from the terminal. Worklight on/off switch in the armrest with beacon on/off switch.

Profiles for operators and implements which can be easily changed from any screen menu. All the setting changes will be saved in the selected profile.

reddot award 2017 winner

MULTIFUNCTIONAL LEVER

1. Rubber grip: With first-class materials the drive lever is ergonomic, easy to use and comfortable.
2. Ergonomic design: The design allows for easy lever movement in all four directions. The button area is in a natural position for your thumb. The buttons and switches are designed with a function first approach, therefore buttons with different functions look different. For example, the latching rocker switch for the rear linkage has a momentary down function for fast soil engagement.
3. Three programmable memory buttons for any tractor operation or operations (U-pilot). For example M1 to increase Driving speed or cruise speed, M2 to decrease it.
4. Two linear levers to control hydraulics.
5. Safety usage: The area between buttons lets your thumb rest without having to keep your fingers on top of the buttons. Humps around linear levers prevent accidental use.
6. Clear, simple lines add to the overall feeling of tranquillity and sturdiness, and improve usability.
7. Forward / reverse lever at the drive lever.

SCREEN

8. No additional screens needed – Auto-Guide and safety camera displays are integrated into the SmartTouch screen. No need for additional monitors that block your visibility.

JOYSTICK

9. The ergonomically positioned hydraulic joystick now includes a 3rd control for hydraulics on top.

BUTTON & REAR LINKAGE AREA

10. Buttons: Their concave and convex shape helps you find frequently used buttons easily and quickly.
11. Rear linkage - The easy-to-use limiter enables even the smallest adjustments of the rear linkage.

DESIGN

12. The functional structure of the armrest provides a good grip on rough terrain. All functions are easy to access due to the logical layout and the armrest gives good support to your hand reducing tension and stress. Location of PTO switches minimizes unintentional usage.
13. Upholstery: Alcantara upholstery for less sweating. Storage space under the cover.
14. Designed in Finland.

N Series 4th generation

SMART IS SIZE. PERFECT IN PERFORMANCE.

The N series is a combination of a practical design, versatility and functionality. The tractor can be tailored to the customer's specific needs to provide optimal performance for any job, fuel-efficiency and lower total cost of ownership. A wide range of mechanical transmission variants and external hydraulic options allows you to choose the right tractor for your farm. These are tractors for medium-sized to large farms and contract work.

105-201 HP
85-136 kW

HITECH/ACTIVE/VERSU/DIRECT

No of speeds: 36+36
Power lift capacity 7,7 t

- Transmission variants
- Stock farming
- Feed supply
- Loader application
- Agricultural applications
- Forestry applications

T Series 4th Generation

BUILT WITH THE OPERATOR IN MIND.

4th generation Valtra T series is a completely redesigned tractor line. The T series tractors are available in four versions: HiTech, Active, Versu, Direct, and feature 155 to 271 hp with up to 1,000 Nm torque for even the most demanding jobs. The Active version is a new line of tractors equipped with 5-step Powershift transmission and mechanically-operated hydraulics powered with a multi-piston pump.

155-271 HP
114-184 kW

HITECH/ACTIVE/VERSU/DIRECT

Transmission: Direct variable speed transmission
HiTech, Active and Versu – Power-Shift revolution
Rear power lift capacity: 8.1-9.5 t

- Machine aggregation
- Transport
- Agricultural applications

S Series

POWERFUL AND COST-EFFICIENT

The S series complements the Valtra tractor range. It features state of the art technologies and unsurpassed comfort. The ergonomic cab is a flawless combination of traditional solutions known from previous models with new technologies. The engine with Selective Catalytic Reduction (SCR) and with dynamic boost ensures unmatched performance.

S233-S353

270-370 HP

201-276 KW

S274-S394

270-405 HP

201-294 KW

HITECH/ACTIVE/VERSU/DIRECT

Transmission: Direct variable speed transmission

HiTech, Active and Versu – Power-Shift revolution

Rear power lift capacity: 8.1-9.5 t

- Machine aggregation
- Transport
- Agricultural applications
